

Type: 2 storey property extension, rear extension and porch

Key Features: Demolition of existing garage, structural steel works, double glazed windows, kitchen, reclaimed tiles internal/external lighting, plumbing, and bricks to compliment the rest of the property.

Project Duration: 9 weeks

Project Description

To build a 2 storey side, rear extension and front porch to create a play room, marge kitchen, and a bedroom with en-suite. The extension had to compliment the existing brickwork, roof tiles, windows and internal design styling.

What We Did

Following the demolition of a garage located to the side of the property. The general construction was all quite straight forward with some major structural steel works holding up the rear top half of the house to give the

kitchen a large open plan with lots of natural light.

For the materials we sourced re-claimed roof tiles that exactly matched the tiles on the existing roof. The double glazing was identical as were the bricks used throughout the build. This enabled the new extensions to blend in perfectly.

We installed all the necessary plumbing and fixtures and fitting to the customers specification.

Customer Feedback

“ Ian and his team were professional, courteous and provided an excellent service. Ian kept us informed at each stage of the project and liaised constantly involving us in the decision making process of all aspects of the job. The outcome of both extensions has been exactly as we had hoped. “

“ Demanded too many cups of tea and bacon butties (ha ha!!) “
