

Type: Orangery built to the rear of countryside property in Angering

Key Features: Orangery with double glazed patio doors and tinted windows, electrics, structural steel works, lighting, and bricks to match the rest of the property.

Project Duration: 6 weeks

Project Description

The client wanted a robust conservatory building to the rear of their property, which would create additional living space with lots of natural light. They also wanted an extension which would be flexible and lend itself to changes of use throughout different times of the year, whilst giving them views of the natural countryside surrounding the property.

What We Did

Rather than build a traditional conservatory, we decided to install an orangery, which is becoming an increasing popular alternative to traditional conservatory. The main reasons include its structural integrity, diversity of space usage, general presentation and lower building control requirements compared to traditional extensions.

The orangery consisted of a half extension and half conservatory, with the main feature being the stunning lantern ceiling. The internals were finished in traditional plaster and the metalwork was constructed from powder coated aluminium, finished in white.

The robustness of the structure enabled the customer to knock the back wall of the house through to create an open-planned environment which lended itself to much more living space.

One of the key benefits to the orangery is its high insulation values, which will help keep heating costs down and maintain a comfortable living environment throughout the year, especially in the winter.

Customer Feedback

“ Ian and his team always arrived on time and kept us informed of their plans. They adapted to changes of the original plan and help develop ideas to end up with a fantastic extension. All work was conducted to a high standard and on budget. His team were polite and friendly and left the site clean and tidy every day. Will recommend you to anyone requiring a builder. Cheers Ian, Helen and I are very happy. “
