

Type: Orangery to the rear of large property with bedroom and balcony in Bournemouth

Key Features: Conservatory with double glazed patio doors and windows, electrics, structural steel works, lighting, tiled flooring and reclaimed roof tiles to match the rest of the property.

Project Duration: 8 weeks

Project Description

We were commissioned to build a conservatory extension to the rear of the property which would maximise the use of space and natural light getting into the property. The extension needed to incorporate a balcony and additional bedroom space on the first floor.

What We Did

The client had very specific ideas of how he wanted this extension to blend in with the house that he had designed. To maximise the use of space and natural

light, we built a large open-planned orangery to the rear of the property which incorporated a spacious open-planned bedroom and wooden balcony. This enabled fantastic views of the local environment and huge amounts of natural light to filter into the property.

To maintain the existing style of the property, we sourced the exact brick match with feature brick work internally and externally.

The internal design, although contemporary in finish, complimented the overall design of the existing structure. We incorporate natural wood, natural tiling and high quality fixtures and fittings.

Customer Feedback

“ Business like approach, quality work, know how, versatility, professional finish, value for money. “
